**Bundle and save in addition to your standard incentive!**  
Two insulation measures, min. 1000 sqft +$500  
Two Kitchen Equipment³ +$300, Three Kitchen Equipment³ +$500
1. Insulation must be installed in an existing building, heated by natural gas, without functional insulation. Rebate will not exceed total project costs. Wall minimum value of R-11 applies only where existing walls have no internal insulation cavities.

2. This measure will only be allowed where the customer agrees to regular trap maintenance and replacement every seven (7) years.

3. Incentive eligibility contingent upon use of natural gas fired domestic hot water serving the specified measure equipment or fixture.

4. For Existing Packaged HVAC Units equipped with Gas Fired Furnace and Direct Expansion Cooling Sections DCV Unit; Controller must meet Joint Utility Advanced Rooftop Control Guidelines.

5. Kitchen equipment is defined as dishwashers, steamers, ovens, fryers, and griddles.

Who is eligible to participate?

- Mixed purpose facilities that include buildings on both Residential Rate Schedule 503 and qualifying Rate Schedules 504, 505, 511, and 570 as part of the same Cascade Natural Gas customer account are also eligible for custom conservation incentives.

- Incentives apply on qualified high-efficiency natural gas equipment such as heating, insulation, water heating systems, cooking equipment installed as replacement, retrofit as well as new installation in place of standard efficiency equipment. If the equipment installation, replacement, or retrofit provides significant increase over existing high-efficiency equipment, and is not listed here please contact program representative for potential custom incentive.

- Eligible measures installed are subject to the available incentives coinciding with the date of the installation as outlined in CNGC’s tariff.

- Customers requesting custom incentives for site-specific energy efficiency measures must submit estimated costs and natural gas savings associated with the project. Natural gas savings are to be calculated using standard engineering practices. CNGC will review the natural gas savings calculations and reserves the right to modify energy savings estimates.
